

AfICTA Submission to the Global Multistakeholder Meeting on the Future of Internet Governance

The *NETmundial* is focused on getting globally acceptable PRINCIPLES for Internet Governance and evolving frameworks for further evolution of the Internet. AfICTA and its members appreciate the opportunity presented by the hosts of *NETmundial* and look forward to active participation in this worthwhile process.

AfICTA supports and promotes the following PRINCIPLES to be adopted for effective governance of the Internet:

1. DO NO HARM, through the protection of human rights for all who use or may be affected by the use of the Internet.
2. OPENNESS, through promoting universal, non-discriminatory and affordable access to the Internet. Poor and remote users must not be disadvantaged.
3. ACCOUNTABILITY, through democratic and transparent processes involving all stakeholders, creating an environment of fair and appropriate standards, regulations and legislation.
4. AWARENESS AND KNOWLEDGE SHARING, supporting innovation, interoperation and functionality.
5. FREEDOM to use the Internet for benign purposes by any individual, community, organisation or enterprise.

AfICTA further submits that the ROADMAP for further evolution of the Internet can only happen when the following are in place:

1. Constructive and continuous engagement, which is happening already in IGF and is expected at *NETmundial*
2. Equal participation of all stakeholders in the Internet Future debate
3. Empowerment of effective participation of stakeholders from developing and least developed economies

4. Recognition that existing multistakeholder institutions have contributed to the Internet's global growth and need to remain at the heart of the Internet governance ecosystem
5. Governments commit to a single, interoperable Internet that can flourish globally, enabling freedom of expression and economic prosperity.
6. Net Neutrality is applied, in that no one user/group of users or type of content should have priority over others.
7. Commitment to prevention of crime and protection of individuals at the global level, with a global justice system to punish transgressors and enforce the rights of victims. We must recognise that the Internet has created new types of economic and personal crime.

The expected resultant effect is CONFIDENCE, STABILITY, SECURITY and RESILIENCY of the Internet for continuous socio-economic development.

About AfICTA

Africa Information & Communication Technologies Alliance (AfICTA) is a private sector-led alliance of ICT Associations, Multi-national Corporations, Companies, Organisations and Institutions in the ICT sector in Africa.

Vision

Our vision is to fulfil the promise of the digital age for everyone in Africa.

Mission

Our mission is to encourage multi-stakeholder dialogue fostering accelerated and ICT enabled development in Africa and the use of cutting-edge innovative technologies including mobile, computing and satellite technologies to achieve an Information society in Africa.

Goals

Our goals are to

1. Organise non-state ICT actors in Africa for effective local and continental advocacy by the year 2015
2. Create awareness and improve African digital literacy by 50% in collaboration with stakeholders by the year 2020
3. Create partnerships with the African Union and all the regional economic commissions towards the realization of the WSIS 2015 targets
4. Position more than 50% of African ICT professionals and experts in the business community, academic and technical community and civil society to be fully engaged in the global Internet Governance multi-stakeholder dialogues by 2015
5. Be the focal point for Africa ICT advocacy in the global digital economy.
6. Promote business partnership between member's associations
7. Contribute to capacities building by promoting best practices, encouraging regional projects, sharing data (skills, expertise, events, business announcements, exhibitions, seminars, etc)
8. Organize regional contests and cross-African advocacy
